

# AI-2002 Artificial Intelligence Spring 2022

## Assignment # 3 Data Annotation

Due date: **April 25, 2022, 1:59 PM**

Requirements: You must have real android device, or blue stack installed in your computer. Android APK file is attached with this assignment. Install it and perform the following task.

Task: You are required to read and record Urdu sentences using Android application. You need to record 200 sentences.

Instructions for Data Annotation:

1. You must record the sentences in your own voice.
2. You must record it in noiseless environment.
3. Your speech must be fluent.
4. The speech must be exactly similar to the text which you are recording.
5. You can only record 30 sentences per day.
6. Once you record a sentence you can play it to verify if it is correctly annotated (in case if error you can re-record it), then you will upload it. The annotation cannot be deleted/ changed after it is uploaded
7. If you can't read a sentence, you can just skip it. Once a sentence is skipped you will not be able to record it later. But remember you have only 20 skips so no not waste it.
8. Please use the attach android app to annotate the sentences.
9. You must sign up using your student email address. Remember the password as you can't reset it, so write it down somewhere.
10. Any recording that does not follow the above instruction will result in zero marks in whole assignment.
